

Satellite radio provides me with everything I need. If it is news, variety of music, weather, ect., I can chose what I need. Radio stations can be bias, racial, dj's rude to sexual prefernces, the list is endless. Satellite with the commercial free listening if free from all of that. There are times when I tune into radio, when I feel the need. I perfer to have options to listen to with out hearing commercials, and other peoples opinions on life. Regect NAB's petition 04-160.

Thank you,

TDean
